

Chicago Loop Council

Date: Monday, May 16, 2011

Speaker: Lisa Newburger, L.I.S.W.-S

Topic: HOW ADVANCE DIRECTIVES CAN REVERSE SPIRALING HEALTH CARE COSTS

YOU want to protect your clients and grow their assets. What do you do? Are you ready to think outside of “the box?” Come and learn an innovative way to provide wealth management by asking your client a simple question. “Do you have an advance directive?” Advance directives are legal documents that allow you to convey your decisions about end-of-life care... ahead of time. Empower your clients to communicate their wishes to their families and physicians. Your role is to give them peace of mind both emotionally and financially.

Lisa Newburger, L.I.S.W.-S. has worked in 35 nursing homes and hospitals as a ventilator social worker, consultant, or supervisor. Her skill and use of humor has helped thousands of patients and families to make difficult choices. As a professional speaker, she has found that humor and drama make it easier for people to talk about difficult topics. Come and hear the information Lisa will share that can help you provide the best care for your clients.
